

# FBC Quick Start Guide

Patterns, Systems and Interpretation

Dr. Ronda Nelson, PhD, MH

## Functional Blood Chemistry Mastery Resources

1	Common Blood Panels .....	4–7
2	Markers by Body System .....	8–9
3	Marker Dysfunctions .....	10–24
4	Common Patterns .....	25–37
5	Other Charts .....	38–40

# 1. Common Blood Panels

Complete Blood Count		
Marker	Optimal	Lab Range
WBC	5.5 – 7.5	3.5 – 10.0
RBC	3.9 – 4.5 female 4.2 – 4.9 male	3.7 – 5.8
Hemoglobin (HGB)	13.5 – 14.5 female 14 – 15 male	12 – 16
Hematocrit (HCT)	37% – 44% female 40% – 48% male	36% – 48.2%
MCV	82 – 89.9	82 – 103
MCH	28 – 31.9	27 – 34
MCHC	32 – 35	30.9 – 35.4
Platelets	150 – 385 (x1000)	150 – 400 (x1000)
RDW	11.7 – 13.0	11 – 15
Neutrophils	40% – 60%	Not established
Lymphocytes	24% – 44%	Not established
Monocytes	0 – 7%	Not established
Eosinophils	0 – 3%	Not established
Basophils	0 – 1%	Not established

Comprehensive Metabolic Panel		
Marker	Optimal	Lab Range
Glucose	75 – 86	65 – 99
BUN	10 – 16	7 – 25
Calcium	9.2 – 10.0	8.6 – 10.4
Carbon Dioxide (CO <sub>2</sub> )	25 – 30	19 – 30
Chloride	100 – 106	97 – 107
Creatinine	0.8 – 1.1	0.5 – 1.0
Sodium	135 – 142	135 – 145
Potassium	4.0 – 4.5	3.5 – 5.3
Albumin	4.0 – 5.0	3.6 – 5.1
Bilirubin, Total	0.3 – 0.9	0.2 – 1.2
Protein, Total	6.9 – 7.4	6.1 – 8.1
ALT	10 – 26	0 – 35
AST	10 – 26	0 – 35
Alkaline Phosphatase	70 – 100	35 – 115
Anion Gap	7 – 12	6.6 – 16

Iron Panel		
Marker	Optimal	Lab Range
Total Iron	85 – 130	40 – 160
Ferritin	30 – 70	10 – 232
TIBC	250 – 350	250 – 425
% Transferrin Saturation	25% – 35%	15% – 50%

Lipid Panel		
Marker	Optimal	Lab Range
Total Cholesterol	180 – 220	100 – 200
LDL	80 – 100	< 130
HDL	55 – 70	40 – 90
VLDL	5 – 40	5 – 40
Triglycerides	70 – 80	50 – 150
Chol/HDL Ratio	0 – 3	0 – 5

Thyroid Panel (Comprehensive)		
Marker	Optimal	Lab Range
TSH	1.3 – 2.0	.45 – 4.5
Total T4	6.0 – 11.9	4.5 – 12
Total T3	90 – 168	71 – 180
Free T4	1.0 – 1.5	0.82 – 1.77
Free T3	3.0 – 3.5	2.0 – 4.4
T3 Uptake	27% – 37%	24% – 39%
Reverse T3	14.9 – 26.7	9.2 – 24.1
TPO Antibody	None	0 – 9 (0 – 34 LabCorp)
Thyroglobulin Ab	None	0.0 – 0.9

## 2. Markers by Body System

### Acid-Base Balance Markers

CO <sub>2</sub>	Chloride
Anion Gap	Potassium

### Adrenal Gland Markers

Potassium	Sodium
Chloride	Triglycerides
Cholesterol	Glucose

### Allergy Markers

Basophils	Eosinophils
-----------	-------------

### Blood Sugar Markers

Glucose	Hemoglobin A1c
LDH	Triglycerides
Total Cholesterol	LDL
HDL	Fasting Insulin
Phosphorus	Total WBCs

### Cardiovascular Markers

Total Cholesterol	Fasting Insulin
Triglycerides	LDL
HDL	LDH
C-Reactive Protein	Ferritin
Fibrinogen	Vitamin D
Homocysteine	Hemoglobin A1c
Glucose	AST

### Gallbladder and Fatty Acid Markers

GGT	Triglycerides
Total Bilirubin	Direct Bilirubin
Total Cholesterol	LDL
Alkaline Phosphatase	ALT

### GI Markers

Protein	BUN
Phosphorous	Creatinine
Globulin	Eosinophils

Immune Markers	
WBCs	Monocytes
Neutrophils	Eosinophils
Lymphocytes	Basophils
Alkaline Phosphatase	Vitamin D
Ferritin	Globulin

Inflammation Markers	
LDH	Alkaline Phosphatase
Albumin	Uric Acid
C-Reactive Protein	Sed Rate
Ferritin	Lymphocytes
Platelets	Fibrinogen
Homocysteine	Cholesterol
Globulin	Iron
HDL	RDW

Kidney Markers	
BUN	Creatinine
BUN/Creatinine ratio	eGFR
Uric Acid	Phosphorus
LDH	AST

Liver Markers		
AST	Total Cholesterol	A/G Ratio
ALT	Triglycerides	Total Protein
LDH	Alkaline Phosphatase	RDW
GGT	Bilirubin	MCV
Ferritin	Albumin	

Mineral Balance Markers		
Calcium	Alkaline Phosphatase	Ferritin
Phosphorous	Iron	Uric Acid

Thyroid Markers		
TSH	Reverse T3	Total T3
Free T3	TGB	T3 Uptake
Free T4	Total T4	TPO

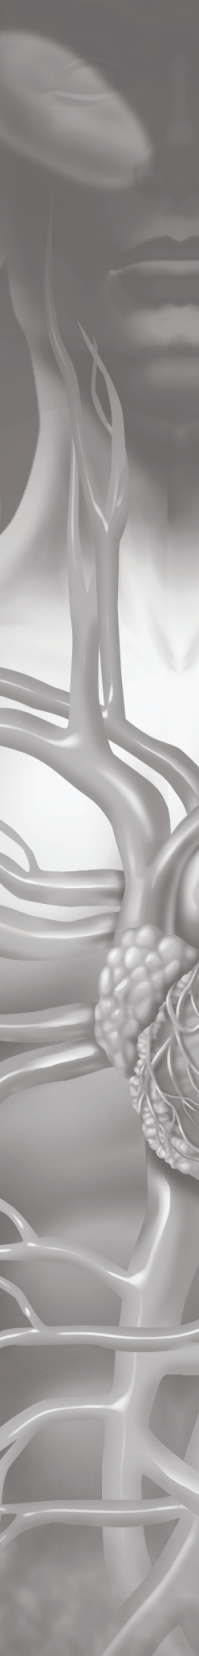

Vitamin Markers		
RBCs	MCHC	Methylmalonic Acid
Homocysteine	ALT	Folate
Vitamin B <sub>12</sub>	GGT	MCH
Alk phos	Anion Gap	AST
MCV	Vitamin D	Albumin

### 3. Marker Dysfunctions

Marker	Decreased	Increased
<b>ALT</b> (Optimal: 10 – 26)	<ul style="list-style-type: none"> <li>• <i>Early stage fatty liver</i></li> <li>• <i>Protein deficiency</i></li> <li>• <i>B<sub>6</sub> deficiency</i></li> <li>• <i>Liver congestion</i></li> <li>• <i>Malabsorption</i></li> <li>• <i>Alcoholism</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dysfunction located inside liver</i></li> <li>• <i>NAFLD</i></li> <li>• <i>Metabolic S, IR, T2D</i></li> <li>• <i>Biliary tract obstruction</i></li> <li>• <i>Viral hepatitis</i></li> <li>• <i>Excessive exercise or muscle breakdown</i></li> <li>• <i>Hepatocyte damage</i></li> <li>• <i>Alcohol consumption</i></li> <li>• <i>Iron overload</i></li> </ul>
<b>AST</b> (Optimal: 10 – 26)	<ul style="list-style-type: none"> <li>• <i>B<sub>6</sub> deficiency</i></li> <li>• <i>Protein deficiency</i></li> <li>• <i>Malabsorption</i></li> <li>• <i>Alcoholism</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dysfunction outside liver and biliary tree</i></li> <li>• <i>Mono, EBV, CMV</i></li> <li>• <i>Early congestive heart disease</i></li> <li>• <i>Hepatocyte damage</i></li> <li>• <i>Acute MI</i></li> <li>• <i>Excessive muscle breakdown</i></li> <li>• <i>Alcohol consumption</i></li> <li>• <i>Liver dysfunction</i></li> <li>• <i>Coronary artery insufficiency</i></li> </ul>
<b>Albumin</b> (Optimal: 4.0 – 5.0)	<ul style="list-style-type: none"> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Insufficient protein intake</i></li> <li>• <i>Liver dysfunction</i></li> <li>• <i>Edema</i></li> <li>• <i>Oxidative stress</i></li> <li>• <i>Need for vitamin C</i></li> <li>• <i>Low T4</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> </ul>

Marker	Decreased	Increased
<b>Albumin/Globulin Ratio</b> (Optimal: 1.4 – 2.1)	<ul style="list-style-type: none"> <li>• <i>Liver dysfunction</i></li> <li>• <i>Immune activation</i></li> <li>• Decreased blood viscosity</li> <li>• Chronic aspirin use</li> <li>• Blood thinners</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Increased blood viscosity/stasis</i></li> <li>• Poor vascular tone</li> <li>• Sedentary lifestyle</li> </ul>
<b>Alkaline Phosphatase</b> (Optimal: 70 – 100)	<ul style="list-style-type: none"> <li>• <i>Zinc deficiency</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Estrogen imbalance</i></li> <li>• <i>Magnesium deficiency</i></li> <li>• <i>Vitamin C deficiency</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Biliary obstruction</i></li> <li>• <i>Increased bone loss or turnover</i></li> <li>• <i>Hepatitis, cirrhosis, fatty liver</i></li> <li>• Vitamin D deficiency</li> <li>• Liver damage due to drug toxicities</li> <li>• Herpes zoster (shingles)</li> <li>• Intestinal hyperpermeability (&gt;100)</li> </ul>
<b>Anion Gap</b> (Optimal: 7 – 12)	<b>(Rare)</b> <ul style="list-style-type: none"> <li>• Lab error</li> <li>• Lithium toxicity</li> <li>• Multiple myeloma</li> <li>• Some neoplasms</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Thiamine (B<sub>1</sub>) deficiency</i></li> <li>• <i>Metabolic acidosis</i></li> </ul>
<b>Basophils</b> (Optimal: 0 – 1%)		<ul style="list-style-type: none"> <li>• <i>Intestinal parasites</i></li> <li>• <i>Non-specific inflammation</i></li> </ul>
<b>Bilirubin</b> (Optimal: 0.3 – 0.9)	<ul style="list-style-type: none"> <li>• Spleen insufficiency</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Biliary stasis (cholecystitis)</i></li> <li>• <i>Biliary obstruction</i></li> <li>• Oxidative stress</li> <li>• Liver dysfunction/injury</li> <li>• RBC breakdown</li> <li>• Gilbert's syndrome</li> </ul>
<b>Bilirubin – Direct</b> (Optimal: 0 – 0.19)		<ul style="list-style-type: none"> <li>• Biliary tract obstruction</li> <li>• Gall stones</li> </ul>

Marker	Decreased	Increased
<b>Bilirubin – Indirect</b> (Optimal: 0.1 – 0.7)		<ul style="list-style-type: none"> <li>• RBC breakdown</li> <li>• Gilbert's Syndrome</li> </ul>
<b>BUN</b> (Optimal: 10 – 16)	<ul style="list-style-type: none"> <li>• <i>Malabsorption</i></li> <li>• <i>Intestinal hyperpermeability</i></li> <li>• <i>Low protein intake</i></li> <li>• Pancreatic insufficiency</li> <li>• Posterior pituitary dysfunction (ADH)</li> <li>• Liver dysfunction</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Renal insufficiency or disease</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Dysbiosis</i></li> <li>• Excessive protein intake</li> <li>• Anterior pituitary dysfunction</li> <li>• Edema</li> <li>• Adrenal stress (cortisol)</li> </ul>
<b>C-Peptide</b> (Optimal: 1.1 – 1.6)	<ul style="list-style-type: none"> <li>• <i>Hypoglycemia</i></li> <li>• <i>Type 1 diabetes</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>General blood sugar dysregulation</i></li> <li>• <i>Type II diabetes</i></li> <li>• <i>Metabolic Syndrome</i></li> <li>• <i>Insulin resistance</i></li> </ul>
<b>CO<sub>2</sub></b> (Optimal: 25 – 30)	<ul style="list-style-type: none"> <li>• <i>Thiamine deficiency</i></li> <li>• <i>Metabolic acidosis</i></li> <li>• Respiratory acidosis</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Metabolic alkalosis</i></li> <li>• Respiratory alkalosis</li> <li>• Adrenal hyperfunction</li> </ul>
<b>Calcium</b> (Optimal: 9.2 – 10.0)	<ul style="list-style-type: none"> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Calcium deficiency</i></li> <li>• <i>Phosphorus or magnesium deficiency</i></li> <li>• <i>Vitamin D deficiency</i></li> <li>• <i>Acid-Base imbalances</i></li> <li>• Parathyroid hypofunction</li> <li>• Malabsorption/malnutrition</li> <li>• Poor fatty acid utilization</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Parathyroid hyperfunction</i></li> <li>• Kidney hypofunction</li> <li>• Impaired cell membrane health</li> <li>• Excess calcium intake</li> </ul>

Marker	Decreased	Increased
<b>Calcium/Phosphorus Ratio</b> (Optimal: 2.3 – 2.7)	<ul style="list-style-type: none"> <li>• <i>Decreased calcium and increased phosphorus</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• Parathyroid hyperfunction</li> <li>• Excessive phosphate intake</li> <li>• Calcium deficiency</li> <li>• Bone growth (children) or bone repair (fractures)</li> <li>• Kidney insufficiency</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Increased calcium and decreased phosphorus</i></li> <li>• Tissue or cell damage</li> <li>• Parathyroid hypofunction</li> <li>• Hyperinsulinemia</li> <li>• High carbohydrate diet</li> <li>• Calcium deposition</li> </ul>
<b>Chloride</b> (Optimal: 100 – 106)	<ul style="list-style-type: none"> <li>• <i>Hypochlorhydria</i></li> <li>• Excessive loss (diarrhea, vomiting, laxatives, sweating)</li> <li>• Insufficient intake</li> <li>• Metabolic alkalosis</li> <li>• Adrenal insufficiency</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Metabolic acidosis</i></li> <li>• Adrenal stress</li> <li>• Excess salt intake</li> </ul>
<b>Cholesterol</b> (Optimal: 180 – 220)	<ul style="list-style-type: none"> <li>• <i>Liver/biliary dysfunction</i></li> <li>• <i>Malnutrition / malabsorption</i></li> <li>• <i>Statin drugs</i></li> <li>• Inflammation or infection</li> <li>• Endocrine disorders</li> <li>• Oxidative stress</li> <li>• Heavy metal burden</li> <li>• Poor cell membrane health</li> <li>• Autoimmune disorders</li> <li>• Hyperthyroidism</li> <li>• Neurological concerns / nerve transmission</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Cardiovascular disease</i></li> <li>• <i>Atherosclerosis</i></li> <li>• <i>Metabolic Syndrome or fatty liver</i></li> <li>• <i>Insulin resistance / dysglycemia</i></li> <li>• <i>Biliary stasis</i></li> <li>• <i>Hypothyroidism</i></li> <li>• Poor metabolism/utilization of fats</li> <li>• Adrenal cortical dysfunction</li> <li>• Hyperlipoproteinemia</li> <li>• Early stage hyperglycemia</li> <li>• Multiple sclerosis</li> </ul>

Marker	Decreased	Increased
<b>Creatinine</b> (Optimal: 0.8 – 1.1)	<ul style="list-style-type: none"> <li>• <i>Muscular atrophy</i></li> <li>• <i>Sedentary lifestyle</i></li> <li>• Muscular degenerative diseases (ALS, MS, etc...)</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Renal insufficiency or disease</i></li> <li>• <i>Dehydration</i></li> <li>• <i>Moderate to high intensity exercise</i></li> <li>• BPH or prostatitis</li> <li>• Uterine hypertrophy or inflammation</li> <li>• Urinary tract congestion</li> <li>• Cardiovascular disease</li> <li>• Creatinine supplementation</li> </ul>
<b>eGFR</b> (Optimal: > 90)	<ul style="list-style-type: none"> <li>• Kidney insufficiency</li> </ul>	
<b>Eosinophils</b> (Optimal: < 3%)		<ul style="list-style-type: none"> <li>• <i>Intestinal parasites</i></li> <li>• <i>Skin issues</i></li> <li>• <i>Food and environmental allergies or sensitivities</i></li> <li>• Asthma</li> </ul>
<b>Fasting Insulin</b> (Optimal: < 5)	<ul style="list-style-type: none"> <li>• <i>Trending toward hypoglycemia</i></li> <li>• <i>Type 1 diabetes</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Early stage Diabetes or glucose intolerance</i></li> <li>• <i>Hyperglycemia or Diabetes</i></li> <li>• <i>Metabolic Syndrome or Insulin Resistance</i></li> <li>• <i>Cardiovascular disease risk</i></li> </ul>
<b>Ferritin</b> (Optimal: 30 – 70)	<ul style="list-style-type: none"> <li>• <i>Iron deficient anemia</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Excess iron consumption</i></li> <li>• <i>Inflammation</i></li> <li>• <i>Cardiovascular disease</i></li> <li>• Liver dysfunction</li> <li>• Oxidative stress</li> <li>• Hemochromatosis / hemosiderosis</li> </ul>

Marker	Decreased	Increased
<b>Fibrinogen</b> (Optimal: 295 – 369)		<ul style="list-style-type: none"> <li>• <i>Atherosclerosis</i></li> <li>• <i>Peripheral artery disease</i></li> <li>• Rheumatoid arthritis</li> <li>• Stroke</li> <li>• Glomerulonephritis</li> <li>• Heart attack</li> </ul>
<b>Folate</b> (Optimal: 15 – 25)		<ul style="list-style-type: none"> <li>• <i>Folate and/or B<sub>12</sub> anemia</i></li> <li>• <i>Poor dietary intake</i></li> <li>• Pregnancy</li> <li>• Antiseizure medications</li> <li>• Methotrexate</li> <li>• Damaged SI lining</li> <li>• Alcoholics</li> </ul>
<b>GGT</b> (Optimal: 10 – 30)	<ul style="list-style-type: none"> <li>• <i>Early stage fatty liver</i></li> <li>• <i>Malabsorption</i></li> <li>• <i>B<sub>6</sub> deficiency</i></li> <li>• Magnesium deficiency</li> <li>• Hypothyroidism</li> <li>• Protein deficiency</li> <li>• Alcoholism</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dysfunction located outside the liver, inside the biliary tree</i></li> <li>• <i>Biliary insufficiency, stasis or gallstones</i></li> <li>• <i>Biliary obstruction</i></li> <li>• Liver disease – hepatitis, fatty liver, etc.</li> <li>• Chronic alcohol or drug use</li> <li>• Acute/chronic pancreatitis</li> <li>• Obesity</li> <li>• Deficiency of fat-soluble nutrients</li> </ul>
<b>Globulin</b> (Optimal: 2.4 – 2.8)	<ul style="list-style-type: none"> <li>• <i>Immune insufficiency</i></li> <li>• Inflammation</li> <li>• Digestive dysfunction</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Immune activation</i></li> <li>• <i>Chemical or heavy metal toxicity</i></li> <li>• Oxidative stress</li> <li>• Liver cell damage</li> </ul>

Marker	Decreased	Increased
<b>Glucose</b> (Optimal: 75 – 86)	<ul style="list-style-type: none"> <li>• <i>Reactive hypoglycemia</i></li> <li>• <i>Excessive insulin</i></li> <li>• <i>Impaired glycogen storage in liver</i></li> <li>• Adrenal hypofunction</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Insulin resistance</i></li> <li>• <i>Early stage diabetes</i></li> <li>• <i>Metabolic Syndrome</i></li> <li>• Thiamine (B<sub>1</sub>) deficiency</li> <li>• Liver congestion or fatty liver</li> <li>• Anterior pituitary resistance to cortisol</li> </ul>
<b>HDL</b> (Optimal: 55 – 70)	<ul style="list-style-type: none"> <li>• Liver congestion / fatty liver</li> <li>• Atherosclerosis</li> <li>• Metabolic Syndrome</li> <li>• Sedentary lifestyle</li> <li>• Oxidative stress</li> <li>• Hyperthyroidism</li> <li>• Heavy metal burden</li> <li>• Hyperlipidemia</li> <li>• Smoking</li> <li>• Obesity</li> </ul>	<ul style="list-style-type: none"> <li>• Familial hypercholesterolemia</li> <li>• Alcohol intake</li> <li>• Use of H<sub>2</sub> blockers</li> <li>• Exogenous estrogen use</li> <li>• Steroid use</li> <li>• Autoimmune diseases</li> </ul>
<b>Hematocrit</b> (Optimal: 37% – 44% female; 40% – 48% male)	<ul style="list-style-type: none"> <li>• <i>Anemia's – iron deficient, B<sub>12</sub>/folate, B<sub>6</sub> and copper</i></li> <li>• <i>Nutrient deficiencies</i></li> <li>• Pregnancy</li> <li>• Inflammation</li> <li>• Bone marrow insufficiency</li> <li>• Increased breakdown in spleen or liver</li> <li>• Chronic diseases</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Exogenous testosterone or steroid hormone use</i></li> <li>• <i>Hypoxia</i></li> <li>• Respiratory distress, pulmonary disease</li> <li>• Smoking</li> <li>• Polycythemia Vera</li> <li>• Spleen hypofunction</li> </ul>

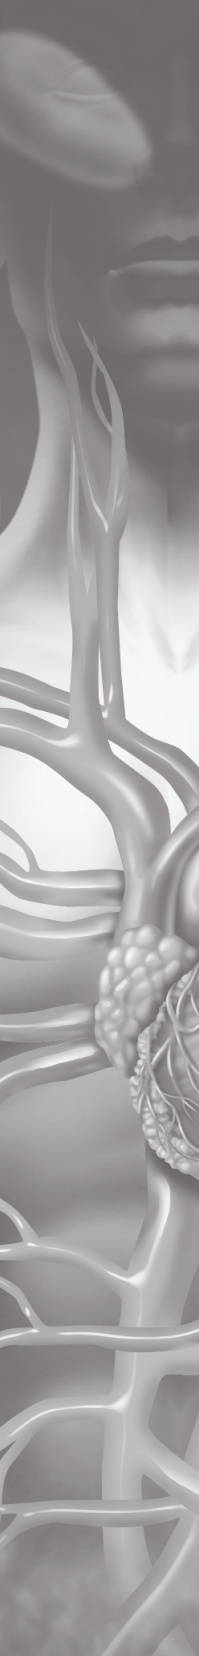

Marker	Decreased	Increased
<b>Hemoglobin</b> (Optimal: 13.5 – 14.5 female; 14 – 15 male)	<ul style="list-style-type: none"> <li>• <i>Anemia's – iron deficient, B<sub>12</sub>/folate, B<sub>6</sub> and copper</i></li> <li>• <i>Internal bleeding or blood loss</i></li> <li>• <i>Nutrient deficiencies</i></li> <li>• <i>Inflammation</i></li> <li>• <i>Intestinal parasites</i></li> <li>• <i>Pregnancy</i></li> <li>• <i>Chronic disease</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Exogenous testosterone use</i></li> <li>• <i>Hypoxia</i></li> <li>• <i>Respiratory distress</i></li> <li>• <i>Polycythemia Vera</i></li> <li>• <i>Spleen hypofunction</i></li> </ul>
<b>Hemoglobin A1c</b> (Optimal: 4.6 – 5.5)	<ul style="list-style-type: none"> <li>• <i>Trending toward hypoglycemia</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Diabetes (if &gt; 6.5)</i></li> <li>• <i>Insulin resistance</i></li> <li>• <i>Cardiovascular disease risk</i></li> </ul>
<b>High Sensitivity CRP</b> (Optimal: < 1.55 female; < 0.55 male)		<ul style="list-style-type: none"> <li>• <i>Inflammation or infection</i></li> <li>• <i>Increased sugar and fat intake</i></li> <li>• <i>Periodontal disease</i></li> <li>• <i>Hypertension</i></li> <li>• <i>Oral contraceptives or HRT</i></li> <li>• <i>Smoking</i></li> </ul>
<b>Homocysteine</b> (Optimal: < 7.2)		<ul style="list-style-type: none"> <li>• <i>Nutrient deficiencies; specifically vitamin B</i></li> <li>• <i>Atherosclerosis</i></li> <li>• <i>Kidney dysfunction</i></li> <li>• <i>Genetic factors</i></li> <li>• <i>Aging</i></li> <li>• <i>Neurological issues</i></li> <li>• <i>Neoplasms</i></li> </ul>
<b>Iron</b> (Optimal: 85 – 130)	<ul style="list-style-type: none"> <li>• <i>Iron deficient anemia</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Internal bleeding</i></li> <li>• <i>Chronic illness</i></li> <li>• <i>Bacterial infection</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Liver dysfunction</i></li> <li>• <i>Excess consumption</i></li> <li>• <i>Viral infection</i></li> <li>• <i>Hemochromatosis or hemosiderosis</i></li> <li>• <i>Thalassemia</i></li> <li>• <i>Hemolytic or sideroblastic anemia</i></li> </ul>

Marker	Decreased	Increased
<b>LDH</b> (Optimal: 140 – 200)	<ul style="list-style-type: none"> <li>• <i>Reactive hypoglycemia</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>B<sub>12</sub>/folate deficiency anemia</i></li> <li>• <i>Liver or biliary obstruction</i></li> <li>• <i>Cardiovascular disease</i></li> <li>• Tissue destruction</li> <li>• Hemolytic anemia (&gt;200)</li> <li>• Non-specific tissue inflammation</li> <li>• Mono, EBV, CMV</li> <li>• Hypothyroidism</li> <li>• Acute and chronic pancreatitis</li> </ul>
<b>LDL</b> (Optimal: 80 – 100)	<ul style="list-style-type: none"> <li>• <i>Need for exercise</i></li> <li>• <i>Steroid hormone imbalances</i></li> <li>• Hyperthyroidism</li> <li>• Severe liver disease</li> <li>• Coronary artery disease</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Atherosclerosis</i></li> <li>• <i>Inflammation / infection</i></li> <li>• <i>Increased refined carb and fat intake</i></li> <li>• <i>Metabolic Syndrome / Insulin resistance</i></li> <li>• <i>Liver congestion / fatty liver</i></li> <li>• Exogenous hormone intake</li> <li>• Elevated cortisol / hypothyroidism</li> <li>• Oxidative stress</li> <li>• Hyperlipidemia</li> </ul>
<b>Lymphocyte</b> (Optimal: 24% – 44%)	<ul style="list-style-type: none"> <li>• <i>Chronic viral infections</i></li> <li>• Oxidative stress or free radical activity</li> <li>• Active infection of unknown cause</li> <li>• Bone marrow insufficiency</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Acute viral infection</i></li> <li>• <i>Chronic viral infections (with low WBC count)</i></li> <li>• <i>Excessive systemic toxins</i></li> <li>• Inflammation</li> <li>• Infectious mononucleosis</li> </ul>
<b>MCH</b> (Optimal: 28.0 – 31.9)	<ul style="list-style-type: none"> <li>• <i>Iron deficient anemia</i></li> <li>• <i>B<sub>6</sub> anemia</i></li> <li>• <i>Heavy menstrual bleeding</i></li> <li>• <i>Vitamin C deficiency</i></li> <li>• Heavy metal burden</li> <li>• Internal bleeding</li> </ul>	<ul style="list-style-type: none"> <li>• <i>B<sub>12</sub>/folate anemia</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• Alcoholism</li> <li>• Hypothyroidism</li> <li>• Liver disease</li> <li>• Pernicious anemia</li> </ul>

Marker	Decreased	Increased
<b>MCHC</b> (Optimal: 32.0 – 35.0)	<ul style="list-style-type: none"> <li>• <i>Iron deficient anemia</i></li> <li>• <i>B<sub>6</sub> anemia</i></li> <li>• <i>Heavy menstrual bleeding</i></li> <li>• <i>Vitamin C deficiency</i></li> <li>• Heavy metal burden</li> <li>• Internal bleeding</li> </ul>	<ul style="list-style-type: none"> <li>• <i>B<sub>12</sub>/folate anemia</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• Alcoholism</li> <li>• Hypothyroidism</li> <li>• Liver disease</li> <li>• Pernicious anemia</li> </ul>
<b>MCV</b> (Optimal: 82.0 – 89.9)	<ul style="list-style-type: none"> <li>• <i>Iron deficient anemia</i></li> <li>• <i>B<sub>6</sub> anemia</i></li> <li>• <i>Heavy menstrual bleeding</i></li> <li>• <i>Vitamin C deficiency</i></li> <li>• Internal bleeding</li> </ul>	<ul style="list-style-type: none"> <li>• <i>B<sub>12</sub>/folate anemia</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• Alcoholism</li> <li>• Hypothyroidism</li> <li>• Liver disease</li> <li>• Pernicious anemia</li> </ul>
<b>Magnesium</b> (Optimal: 2.2 – 2.5)	<ul style="list-style-type: none"> <li>• <i>Magnesium deficiency</i></li> <li>• <i>Poor dietary intake</i></li> <li>• <i>Muscle spasms or cramps</i></li> <li>• Hyperinsulinemia</li> <li>• Aging</li> <li>• Oral contraceptives or other HRT</li> <li>• Acute emotional stress</li> <li>• Antidiuretics</li> </ul>	<ul style="list-style-type: none"> <li>• Thyroid dysfunction</li> <li>• Anterior pituitary dysfunction</li> <li>• Kidney dysfunction</li> </ul>
<b>Methylmalonic Acid</b> (Optimal: 0 – 260)		<ul style="list-style-type: none"> <li>• <i>Parietal cell insufficiency</i></li> <li>• <i>Vitamin B<sub>12</sub> deficiency</i></li> <li>• Impaired absorption of B<sub>12</sub></li> <li>• Kidney insufficiency</li> </ul>
<b>Monocyte</b> (Optimal: 0% – 7%)		<ul style="list-style-type: none"> <li>• <i>Recovery phase of acute infection</i></li> <li>• <i>Intestinal parasites</i></li> <li>• Liver dysfunction</li> <li>• BPH</li> </ul>

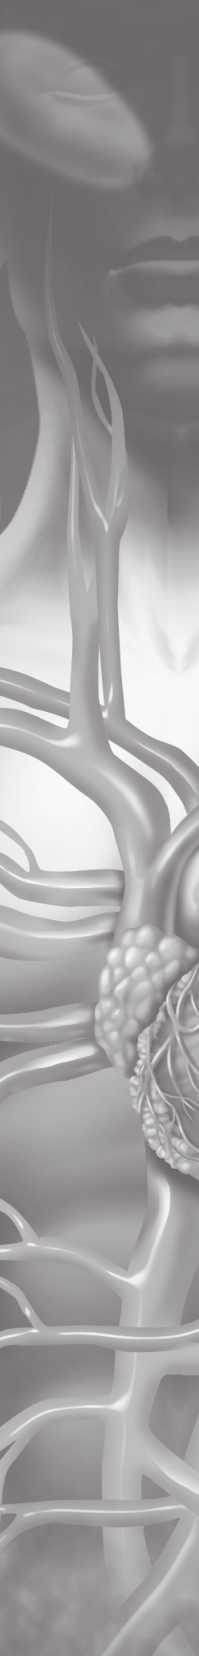

Marker	Decreased	Increased
<b>Neutrophils</b> (Optimal: 40% – 60%)	<ul style="list-style-type: none"> <li>• <i>Chronic viral infections</i></li> <li>• Leukemia</li> <li>• Pernicious anemia</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Acute bacterial infections</i></li> <li>• <i>Chronic bacterial infections</i></li> <li>• Inflammation</li> <li>• Gout, RA, SLE</li> <li>• Dysbiosis</li> </ul>
<b>Phosphorus</b> (Optimal: 3.0 – 4.0)	<ul style="list-style-type: none"> <li>• <i>Hypochlorhydria</i></li> <li>• <i>Excess sweating or dehydration</i></li> <li>• <i>Excessive carbohydrate intake</i></li> <li>• Parathyroid hyperfunction</li> <li>• Hyperinsulinemia</li> <li>• Alcoholism</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Excess phosphorus consumption</i></li> <li>• Calcium deposition</li> <li>• Osteoporosis</li> <li>• Kidney insufficiency</li> <li>• Parathyroid hypofunction</li> <li>• Bone growth and repair</li> </ul>
<b>Platelet</b> (Optimal: 185 – 385 [x1000])	<ul style="list-style-type: none"> <li>• <i>Infections</i></li> <li>• <i>Oxidative stress</i></li> <li>• <i>Folate/B<sub>12</sub> deficiency</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Atherosclerosis</i></li> <li>• <i>Inflammation</i></li> <li>• Excessive antioxidant stress</li> </ul>
<b>Potassium</b> (Optimal: 4.0 – 4.5)	<ul style="list-style-type: none"> <li>• <i>Adrenal stress</i></li> <li>• <i>Insufficient dietary intake</i></li> <li>• Diuretic use</li> <li>• Hypertension</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Metabolic acidosis</i></li> <li>• Cell damage or destruction</li> <li>• Adrenal hypofunction</li> </ul>
<b>Protein</b> (Optimal: 6.9 – 7.4)	<ul style="list-style-type: none"> <li>• <i>Protein deficiency</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• Liver dysfunction</li> <li>• Digestive dysfunction and/or inflammation</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• Liver / biliary dysfunction</li> <li>• Increased globulin</li> </ul>

Marker	Decreased	Increased
<b>Sodium</b> (Optimal: 135 – 142)	<ul style="list-style-type: none"> <li>• <i>Adrenal hypofunction</i></li> <li>• <i>Dietary insufficiency</i></li> <li>• <i>Excessive sweating</i></li> <li>• Addison's disease</li> <li>• Diuretics, vomiting or diarrhea</li> <li>• Edema</li> <li>• Chronic renal insufficiency</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• Cushing's disease</li> <li>• Adrenal stress</li> <li>• Water softeners</li> <li>• Congestive heart failure</li> </ul>
<b>Sodium/Potassium Ratio</b> (Optimal: 30 – 35)	<ul style="list-style-type: none"> <li>• Chronic stress</li> <li>• Adrenal insufficiency</li> <li>• Catabolism</li> </ul>	<ul style="list-style-type: none"> <li>• Acute stress</li> <li>• Possible inflammation</li> </ul>
<b>RBC</b> (Optimal: 3.9 – 4.5 female; 4.2 – 4.9 male)	<ul style="list-style-type: none"> <li>• <i>Anemia's – iron deficient, B<sub>12</sub>/folate, B<sub>6</sub> and copper</i></li> <li>• <i>Internal bleeding or blood loss</i></li> <li>• <i>Nutrient deficiencies</i></li> <li>• Inflammation</li> <li>• Pregnancy</li> <li>• Chronic disease – cancer, some AI conditions, kidney disease, sickle cell, thalassemia or hemolytic anemia</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Dehydration</i></li> <li>• <i>Hypoxia</i></li> <li>• Respiratory distress</li> <li>• Polycythemia Vera</li> <li>• Spleen hypofunction</li> </ul>
<b>RDW</b> (Optimal: 11.7 – 13.0)	<ul style="list-style-type: none"> <li>• Post-hemorrhagic anemia</li> </ul>	<ul style="list-style-type: none"> <li>• <i>B<sub>12</sub>/folate anemia</i></li> <li>• <i>Iron deficient anemia</i></li> </ul>
<b>Reticulocyte Count</b> (Optimal: 0.5 – 1.5)	<ul style="list-style-type: none"> <li>• <i>Anemia</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Occult bleeding</i></li> <li>• Increased hemolysis</li> </ul>
<b>TIBC</b> (Optimal: 250 – 350)	<ul style="list-style-type: none"> <li>• <i>Iron overload</i></li> <li>• Hemochromatosis / hemosiderosis</li> <li>• Chronic infection</li> <li>• Chronic illness</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Iron deficiency anemia</i></li> <li>• <i>Hypochlorhydria</i></li> </ul>

Marker	Decreased	Increased
<b>TSH</b> (Optimal: 1.3 – 2.0)	<ul style="list-style-type: none"> <li>• Pituitary or hypothalamus dysfunction or signaling</li> <li>• Hyperthyroid or Graves' disease</li> <li>• Heavy metal burden</li> <li>• Thyroid medications</li> <li>• Hashimoto's</li> </ul>	<ul style="list-style-type: none"> <li>• Primary Hypothyroidism</li> <li>• Anterior pituitary dysfunction</li> <li>• Liver congestion</li> <li>• Hashimoto's</li> <li>• Stress</li> <li>• Sex hormone dysfunction</li> <li>• Thyroiditis</li> </ul>
<b>Transferrin</b> (Optimal: 200 – 370)	<ul style="list-style-type: none"> <li>• Iron overload</li> <li>• Inflammation or infection</li> <li>• Liver disease</li> <li>• Malnutrition</li> <li>• Sideroblastic and hemolytic anemias</li> <li>• Blood transfusions</li> </ul>	<ul style="list-style-type: none"> <li>• Hormonal changes (ex: oral contraceptives)</li> <li>• Iron deficiency anemia</li> </ul>
<b>% Transferrin Saturation</b> (Optimal: 25% – 35%)	<ul style="list-style-type: none"> <li>• Iron-deficient anemia</li> <li>• Hypochlorhydria</li> <li>• Chronic infection or illness</li> </ul>	<ul style="list-style-type: none"> <li>• Iron overload</li> <li>• Hemochromatosis / hemosiderosis</li> <li>• Sideroblastic anemia</li> <li>• Hemolytic anemia</li> </ul>
<b>Triglycerides</b> (Optimal: 70 – 80)	<ul style="list-style-type: none"> <li>• Protein malnutrition</li> <li>• Insufficient fat intake</li> <li>• Liver or biliary dysfunction</li> <li>• Autoimmune disorders</li> <li>• Hyperthyroidism</li> </ul>	<ul style="list-style-type: none"> <li>• High carb or high fat diet</li> <li>• Cardiovascular disease</li> <li>• Poor metabolism of fats</li> <li>• Primary hypothyroidism</li> <li>• Atherosclerosis</li> <li>• Secondary hypothyroidism / anterior pituitary dysfunction</li> <li>• Liver congestion / fatty liver</li> <li>• Alcoholism</li> <li>• Metabolic Syndrome / Insulin resistance</li> <li>• Estrogen or oral contraceptives</li> <li>• Excess fructose consumption</li> <li>• Early stage dysglycemia</li> </ul>

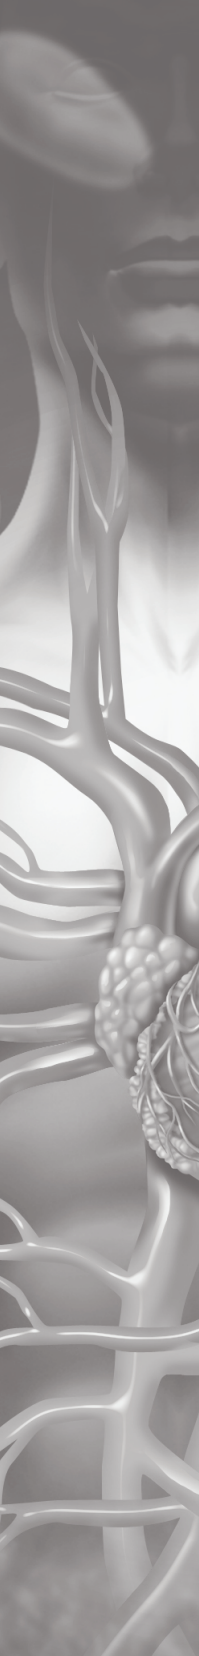

Marker	Decreased	Increased
<b>UIBC</b> (Optimal: 130 – 300)	<ul style="list-style-type: none"> <li>• <i>Iron overload</i></li> <li>• Hemochromatosis / hemosiderosis</li> <li>• Microscopic bleeding</li> <li>• Chronic infection or illness</li> <li>• Hemolytic anemia</li> <li>• Sideroblastic anemia</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Iron deficiency anemia</i></li> <li>• <i>Hypochlorhydria</i></li> </ul>
<b>Uric Acid</b> (Optimal: 3.0 – 5.5 female; 3.5 – 5.9 male)	<ul style="list-style-type: none"> <li>• <i>B<sub>12</sub>/folate anemia</i></li> <li>• <i>Molybdenum deficiency</i></li> <li>• Copper deficiency</li> <li>• Pregnancy</li> <li>• Aspirin use</li> <li>• Heavy metals</li> <li>• Corticosteroids</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Atherosclerosis</i></li> <li>• Oxidative stress</li> <li>• <i>Metabolic Syndrome</i></li> <li>• Bone spurs</li> <li>• Inflammation</li> <li>• Gout</li> <li>• Hypertension</li> <li>• Renal dysfunction</li> <li>• Raynaud's</li> <li>• Cirrhosis</li> <li>• Rheumatoid arthritis</li> <li>• Increased cellular destruction</li> <li>• Stroke</li> </ul>
<b>Vitamin B<sub>12</sub></b> (Optimal: 450 – 800)	<ul style="list-style-type: none"> <li>• <i>Poor dietary intake or vegan/vegetarian</i></li> <li>• <i>Malabsorption</i></li> <li>• <i>Hypochlorhydria</i></li> <li>• SIBO / Celiac</li> <li>• Pancreatic insufficiency</li> <li>• Pernicious anemia</li> <li>• Gastric bypass</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Inadequate tissue uptake</i></li> <li>• Neoplasms</li> <li>• Diabetes</li> <li>• Severe liver disease</li> </ul>

Marker	Decreased	Increased
<b>Vitamin D</b> (Optimal: 35 – 50)	<ul style="list-style-type: none"> <li>• <i>Insufficient dietary intake</i></li> <li>• <i>Decreased cholesterol</i></li> <li>• Impaired liver function</li> <li>• Renal insufficiency</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Vitamin D overdose</i></li> <li>• <i>Elevated serum calcium</i></li> <li>• Abnormal calcium accumulation</li> </ul>
<b>WBC</b> (Optimal: 5.5 – 7.5)	<ul style="list-style-type: none"> <li>• <i>Chronic viral infection</i></li> <li>• <i>Chronic bacterial infection</i></li> <li>• <i>Pancreatic insufficiency</i></li> <li>• Bone marrow insufficiency</li> <li>• Raw food diet</li> <li>• Systemic Lupus Erythematosus</li> <li>• High-performance athletes</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Acute viral infection</i></li> <li>• <i>Acute bacterial infection</i></li> <li>• <i>Stress</i></li> <li>• Intestinal parasites</li> <li>• Diet high in refined foods</li> <li>• Certain cancers</li> </ul>

## 4. Common Patterns

Marker	Decreased	Increased
<b>Adrenal Hyperfunction</b>	<ul style="list-style-type: none"> <li>• Potassium (&lt; 4.0)</li> <li>• Cholesterol (&lt; 180)</li> <li>• Triglycerides (&lt; 70)</li> </ul>	<ul style="list-style-type: none"> <li>• Sodium (&gt; 142)</li> <li>• Chloride (&gt; 106)</li> <li>• CO<sub>2</sub> (&gt; 30)</li> <li>• BUN (&gt; 16)</li> </ul>
<b>Adrenal Hypofunction</b>	<ul style="list-style-type: none"> <li>• Sodium (&lt; 135)</li> <li>• Chloride (&lt; 100)</li> <li>• Glucose (&lt; 75)</li> </ul>	<ul style="list-style-type: none"> <li>• Potassium (&gt; 4.5)</li> <li>• Cholesterol (&gt; 220)</li> <li>• Triglycerides (&gt; 80)</li> </ul>
<b>Alcohol Use</b>		<ul style="list-style-type: none"> <li>• GGT (&gt; 30)</li> <li>• Triglycerides (&gt; 80)</li> <li>• ALT (&gt; 30 – possible)</li> <li>• AST (&gt; 30 – possible)</li> </ul>
<b>Anemia – B<sub>6</sub></b>	<ul style="list-style-type: none"> <li>• Hematocrit (&lt; 37% female; &lt; 40% male)</li> <li>• MCV (&lt; 82)</li> <li>• MCH (&lt; 28)</li> <li>• MCHC (&lt; 32)</li> </ul>	<ul style="list-style-type: none"> <li>• Hemoglobin (N or &gt; 14.5 female; N or &gt; 15 male)</li> <li>• Serum iron (N or &gt; 100)</li> </ul>
<b>Anemia – B<sub>12</sub>/Folate Deficiency</b>	<ul style="list-style-type: none"> <li>• RBCs (&lt; 3.9)</li> <li>• HCT (&lt; 37% female; &lt; 40% male)</li> <li>• HGB (&lt; 13.5 female; &lt; 14 male)</li> <li>• WBCs (&lt; 5.5)</li> <li>• Neutrophils (&lt; 40%)</li> <li>• Uric acid (&lt; 3.0 female; &lt; 3.5 male)</li> <li>• Serum B<sub>12</sub> (&lt; 450)</li> <li>• Folate (&lt; 15)</li> </ul>	<ul style="list-style-type: none"> <li>• MCH (&gt; 31.9)</li> <li>• MCV (&gt; 89.9 – if above 99, not being absorbed well; may need IM)</li> <li>• RDW (&gt; 13)</li> <li>• MCHC (&gt; 35)</li> <li>• LDH (&gt; 200)</li> <li>• Methylmalonic Acid (&gt; 260)</li> <li>• Homocysteine (&gt; 7.2)</li> </ul>

Marker	Decreased	Increased
<b>Anemia – Copper Deficiency</b>	<ul style="list-style-type: none"> <li>• Uric acid (&lt; 3.5)</li> <li>• HCT (&lt; 37% female; &lt; 40% male)</li> <li>• HGB (&lt; 13.5 female; &lt; 14 male)</li> <li>• RBCs (&lt; 3.9 female; &lt; 4.2 male)</li> </ul>	<ul style="list-style-type: none"> <li>• MCV (&gt; 89.9)</li> <li>• MCH (N or &gt; 31.9)</li> <li>• Bilirubin (&gt; 1.2)</li> <li>• Alk phos (&gt; 100)</li> </ul>
<b>Anemia – Iron Deficiency</b>	<ul style="list-style-type: none"> <li>• Serum iron (&lt; 85)</li> <li>• Ferritin (&lt; 30)</li> <li>• % Transferrin saturation (&lt; 25%)</li> <li>• RBCs (N or &lt; 3.9 female; N or &lt; 4.2 male)</li> <li>• HGB (&lt; 13.5 female; &lt; 14 male)</li> <li>• HCT (N or &lt; 37% female; N or &lt; 40% male)</li> <li>• MCV (&lt; 82)</li> <li>• MCH (&lt; 28)</li> <li>• MCHC (&lt; 32)</li> <li>• Globulin (&lt; 2.4)</li> <li>• Phosphorus (&lt; 3.0)</li> </ul>	<ul style="list-style-type: none"> <li>• TIBC (&gt; 350)</li> <li>• Transferrin (&gt; 370)</li> <li>• Globulin (&gt; 2.8 if hypochlorhydria is present)</li> <li>• RDW (&gt; 13.0)</li> </ul>
<b>Anemia – Vitamin C</b>	<ul style="list-style-type: none"> <li>• RBC (&lt; 3.9 female; &lt; 4.2 male)</li> <li>• HGB (&lt; 13.5 female; &lt; 14 male)</li> <li>• HCT (&lt; 37% female; &lt; 40% male)</li> <li>• MCH (&lt; 28)</li> <li>• MCHC (&lt; 32)</li> <li>• Serum iron (&lt; 50)</li> </ul>	<ul style="list-style-type: none"> <li>• MCV (&gt; 89.9)</li> </ul>
